Coverage rises as intervals widen
151 planets; equal planet weights
Convolved measured-time intervals
M1
M3
M2
M0
Nominal 95%
Measured-time coverage (%)
Mean interval width (minutes)
HR 858 b: the dominant score gain still misses
M2 latent 95% interval
M0 latent 95% interval
Saved timings + reported 95% limits
16 accepted events; all outside both measured-time 95% intervals
Latent bands shown here exclude measurement uncertainty.
Time relative to issued prediction (minutes)
Transit number in the issued ephemeris
